

## **METHOD FOR WEB PAGE RULES COMPLIANCE TESTING**

### **ABSTRACT OF THE DISCLOSURE**

5       The present invention provides a method of testing a hypertext document for compliance with a selected criterion. The method (200) provides user prompts (201) for accepting user selections (202) of parameters to test a web page (or web pages) for compliance with selected rules. The web page is obtained (203) and sent, with selected rules, to a rules engine (204) for an analysis based on the selected rules (206). The raw analysis data is generated and stored (208). The analysis data is compiled and presented  
10       (210) to a user for error tracking and/or correction (212).
